

Semester: Registration Readiness Pilot, Procurement Pack

Customer-safe draft for discovery, scoping and evidence exchange

Customer-safe DRAFT. Not approved for external distribution: the approval record in section 1 is blank. The [VERIFIED: ...] evidence pointers and the final approver annex are for the approver and are replaced or removed before distribution.

A business description for discovery and scoping. It is not an offer, a contract term, or legal, security, privacy or accessibility advice. Nothing here commits Semester to launch, price or deliver.

ASSUMPTION VERIFIED DRAFT INTERNAL APPROVED REVIEW

Every statement is labelled. No item in this document is a customer-facing approved claim: no named approver is recorded for any wording.

How to read the labels

Labels apply to a section, a table row or a bullet, not to every sentence. The count is how many label tags appear in this document; legend mentions in code formatting are not counted.

Label	Meaning	Count
VERIFIED	Verified implementation or evidence. Backed by a path in the repository or an evidence id.	31
ASSUMPTION	Planning assumption. A number, rate, timing or price chosen to plan with. Not evidenced.	0
DRAFT	Draft requiring review. Default for anything new.	2
APPROVED	Customer-facing approved claim. Needs a named approver and a register row. None exists today.	0
INTERNAL	Internal-only material. Never to be sent to a customer or prospect as written.	0
REVIEW	Professional review required: counsel, tax, accounting, insurance, privacy, security, accessibility or procurement.	6

Planning assumptions are labelled ASSUMPTION. **Verified claims** are labelled VERIFIED and name their evidence. **Draft and internal items** are labelled DRAFT and INTERNAL. **Customer-facing approved material** is labelled APPROVED and is absent: the count above is zero. **Professional-review items** carry a REVIEW flag naming the profession.

Contents

- 1. Approval record and status
 - 2. What Semester is
 - 3. The proposed pilot concept
 - 4. What an engagement can include today
 - 5. Student experience principles
 - 6. Security, privacy, accessibility and AI: process, not certification
 - 7. Current limitations
 - 8. Pricing and terms
 - 9. Mutual Action Plan

 - 11. Approver annex (remove before distribution)
-

1. Approval record and status

Approval record (to be completed before any use)

An approval for one audience, channel or date does not authorize another (`PUBLIC-CLAIMS-APPROVAL-REGISTER.md`).

Field	Value
Claims owner who approves	[NAME - NOT RECORDED]
Specialist and legal reviewers (as the register's rows require)	[NOT RECORDED]
Approved audience, channel, jurisdiction	[NOT RECORDED]
Approval date and expiry	[NOT RECORDED]
Withdrawal owner and monitoring location	[NOT RECORDED]
Variant approved (this exact text, version)	[NOT RECORDED]

Until every field is filled, this document is internal. The default when evidence or authority is unclear is: do not publish.

2. What Semester is

1. What Semester is

1. "Semester is an academic planning and productivity experience that helps students organize academic context, tasks, deadlines and plans." [VERIFIED: PUBLIC-CLAIMS-APPROVAL-REGISTER.md row CLM-001; local product paths and golden journey]. This describes the exercised experience only; it does not describe outcomes or an official record.
2. "Semester is local-first, with optional account synchronization." CONDITIONAL (CLM-002). Qualifier: device persistence and export exist; account synchronization must be qualified for the intended target and version before it is described to a specific audience.
3. "Semester is in private or invitation-based validation." [VERIFIED: GO-NO-GO-DECISION.md , 2026-10-03; CLM-003]. Individual use is limited to invitation-only, unpaid validation.
4. "Where Semester shows a source label beside a fact, the label says where the fact came from (institution verified, imported, student entered, estimated, AI-assisted or needs review) and, where known, when it was last updated." [VERIFIED: docs/CLM-018-SOURCE-LABEL-EVIDENCE.md ; CLM-018, scoped wording only]. Do not generalize this to "every fact says where it came from"; the register states that wording is not supported.

2. How Semester relates to your existing systems

1. "Semester can work alongside existing university systems in a bounded pilot." CONDITIONAL (CLM-004). Qualifier: this is a proposed offer; it may be said only in a non-activation scoping conversation with its conditions stated prominently, and it requires product, security, privacy, legal and customer approval before any activation.
2. Semester sits beside your systems of record. Your institution's own systems remain the official record for registration, grades and eligibility. [VERIFIED: docs/pilot/KNOWN-LIMITATIONS.md : "Register, drop, pay and submit in your university's own systems"].
3. No registrar, student-information or learning-system connection is live for any institution at this time. [VERIFIED: docs/pilot/KNOWN-LIMITATIONS.md ; PUBLIC-CLAIMS-APPROVAL-REGISTER.md CLM-005]. Early scope uses manual or student-controlled inputs, or approved read-only sources where an institution approves them.

3. The proposed pilot concept

3. The proposed pilot concept

The Registration Readiness Pilot is a **proposed concept for discovery and scoping**. It is not an available service, and nothing in this section is a quote or a commitment. CONDITIONAL (CLM-004).

Element	Description	Evidence pointer
Focus	one registration-readiness or term-start workflow	[VERIFIED: <code>docs/commercial/PILOT-OFFER.md</code> (controlled conditional offer)]
Participants	one defined cohort	[VERIFIED: <code>PilotPlan</code> and <code>pilotReadiness</code> in <code>app/src/lib/gtm/pilot.ts</code>]
Inputs	manual or student-controlled; approved read-only sources only if your institution approves them	[VERIFIED: <code>PilotPlan.dataPlan</code> in <code>pilot.ts</code> : minimum necessary, read-only first, source labelled]
People	a named executive sponsor and a named operational champion on your side	[VERIFIED: <code>pilot.ts</code> readiness checks]
Success criteria	written before the pilot starts, with a baseline for each measure	[VERIFIED: <code>pilot.ts</code> readiness checks]
Decision	a written decision date and a midpoint review; the pilot is not complete until a signed decision is recorded	[VERIFIED: <code>pilot.ts</code> (<code>pilotVerdict</code>)]
Duration	[PILOT LENGTH TO BE CONFIRMED]	n/a
Price and terms	[PRICE TO BE CONFIRMED] ; terms are non-binding drafts pending counsel review	register row CLM-015
Exit	offboarding is part of the plan	[VERIFIED: <code>docs/commercial/PILOT-OFFER.md</code>]

What a pilot would measure (definitions, not results): activation, first meaningful action, workflow completion, weekly use, staff time and support friction, student confidence and satisfaction (self-reported), support issues, and readiness for an annual decision. [VERIFIED: definitions only in `docs/market-readiness/METRIC-DICTIONARY.md`; no values exist].

What the pilot is not: it is not a replacement for any official system, not an automated advising or eligibility decision, and not an individual risk-scoring tool. [VERIFIED: `docs/commercial/IDEAL-CUSTOMER-PROFILE.md`; CLM-006 classification: replacement claims are prohibited].

3. Proposed workflow: Registration Readiness Pilot (default wedge) DRAFT

Students voluntarily use Semester beside existing systems to prepare for [registration / term start]: set up minimum context manually, see Today/This Week, receive one prioritized, source-labelled, reversible action (complete, schedule, snooze or defer), know where to get help, and track a non-authoritative readiness checklist. Official records, registration, grades, aid and advising decisions stay in the institution's systems. Details: `../commercial/PILOT-OFFER.md`.

11. Cadence, midpoint and final review

Weekly pilot report (`../templates/WEEKLY_PILOT_REPORT.md`) and review; midpoint executive review on [DATE] (`../templates/MIDPOINT_EXECUTIVE_REVIEW.md`); final value review (`../templates/FINAL_VALUE_REPORT.md`) before the conversion decision.

4. What an engagement can include today

4. What an engagement can include today

[VERIFIED: `GO-NO-GO-DECISION.md` , 2026-10-03.] Today, engagement is limited to:

- discovery conversations;
- demonstrations using **synthetic** data;
- evidence exchange, including a fit and limitations review; and
- conditional, non-binding scoping.

In this phase Semester is not accepting live customer data, activating a tenant for a customer, accepting payment, or committing to a launch date. These steps are held until the applicable review and approval conditions are met and recorded for the exact scope.

5. Student experience principles

5. Student experience principles

1. Student agency: students choose what to set up, can use a manual path, and can export or delete their data. [VERIFIED: [docs/market-readiness/TRUST-CENTER-CONTENT.md](#) (privacy section: export, correction, deletion paths, subject to identity verification, institutional record duties, legal holds and backup expiry)].
2. No individual risk scoring and no sale of student data. [VERIFIED: [docs/market-readiness/ADVERTISING-AND-MONETIZATION-POLICY.md](#) : "Semester does not sell student or institutional data"; [docs/commercial/CUSTOMER-HEALTH-SCORE.md](#) : "Never penalize students"].
3. Engagement without pressure: no streaks, leaderboards, shame notifications or fear-based urgency. [VERIFIED: [docs/ETHICAL-ENGAGEMENT-AND-NOTIFICATIONS.md](#) hard boundaries, held by a structural test].
4. Reported results are cohort aggregates, suppressed when a group is small. [VERIFIED: the $n \geq 10$ floor in [docs/PAID-PILOT-FRAMEWORK.md](#) and [docs/commercial/GROWTH-FUNNEL-SPEC.md](#) (proposed threshold)].

6. Security, privacy, accessibility and AI: process, not certification

6. Security, privacy, accessibility and AI: process, not certification

1. "Semester maintains repository-tested security, privacy, authorization and lifecycle controls for defined paths." [VERIFIED: docs/trust/CONTROL-FACTS.md (generated from the repository); CLM-009]. Qualifier: cite the exact control and revision; this does not describe an independent assessment or a production target.
2. "Semester includes automated accessibility guards and selected browser accessibility checks."
[VERIFIED: CLM-007; scope is the six-route local checks]. This is not a conformance conclusion.
3. "Semester offers assistive AI features with human review and bounded controls." CONDITIONAL (CLM-011). Qualifier: state the exact feature, provider and data path and the limitations; review by AI, privacy, security, product and legal is open.
4. Materials under non-disclosure (security control matrix, data-flow map, evidence index, draft pilot paper) are shared through a controlled trust room, not through marketing copy. [VERIFIED: docs/market-readiness/TRUST-CENTER-CONTENT.md ; trust-room controls in docs/gtm/EXECUTION-PLAN.md].

7. Current limitations

7. Current limitations (stated plainly)

Each item is a limitation stated by the repository's own trust documents. [VERIFIED: [docs/market-readiness/TRUST-CENTER-CONTENT.md](#) and [docs/pilot/KNOWN-LIMITATIONS.md](#) unless another path is given).

Area	Current state
Independent security assessment	A penetration test is at plan stage only; none is completed
Accessibility	Semester targets WCAG 2.2 AA as an alignment target; a formal accessibility conformance report and independent evaluation are not currently available
Agreements	The data-processing and pilot agreements exist as issue lists, outlines and drafts; none is executed (docs/trust/DPA-CHECKLIST.md , PILOT-AGREEMENT-OUTLINE.md)
Insurance	Not evidenced
Integrations	No registrar, student-information or learning-system connection is live for an institution
Support	Pilot-scoped with agreed hours and severities; no round-the-clock support is offered
Status communication	A public multi-service status operation is not evidenced
Questionnaires	A security questionnaire response (HECVAT) is prepared as a draft and evidence index; it is not a completed or certified assessment
Customers and outcomes	There are no named customers, case studies or measured outcomes to report

8. Pricing and terms

13. Pricing - [PRICE TO BE CONFIRMED] REVIEW: counsel REVIEW: tax

No price is approved (CLM-015 PROHIBITED; ../../commercial/PRICING-AND-PACKAGING.md).

Item	Amount	Bas is	Terms
Pilot fee	[PRICE TO BE CONFIRMED] (or "no-fee design-partner term" if approved by authorized paper)	[..]	[..]
Implementation fee	[PRICE TO BE CONFIRMED]	[..]	[..]
Annual conversion price	[PRICE TO BE CONFIRMED]	[..]	Any pilot credit: [none / PLACEHOLDER]
Taxes, expenses, payment schedule, PO requirements	[to be set by authorized paper]		

Acceptance of any paid term is **held** (paid pilot NO-GO/RED).

14. Non-guarantee language REVIEW: counsel

This pilot is a structured evaluation. Semester does not guarantee any outcome, including usage, time or cost savings, retention, graduation, GPA or wellbeing effects. Results depend on the cohort, the baseline and many factors outside Semester's control, and will be reported with their limitations. Conversion is a separate decision for [Institution] and a new transaction; it is never automatic. Either party may decide to stop. Dates and capabilities are plans until both parties accept them in signed paper.

9. Mutual Action Plan

The plan DRAFT

Due dates are shown relative to anchors so they survive a shifted start: **K** = kickoff (launch day, only after the launch gate), **E** = pilot end date, **D** = conversion decision date. Replace with calendar dates when owners accept them.

#	Workstream	Customer owner	Semester owner	Deliverable / completion evidence	Due date	Status	Blocker
1	Executive sponsorship	[Sponsor name]	Harrison Rubin (interim)	Sponsor named in writing; agrees decision date and stop/convert criteria; attends midpoint and final	[K-8 weeks]	Not started	
2	Security review	[Security contact]	Security owner [unassigned] (Harrison Rubin interim)	Questionnaire answered from the RFP library with each answer labelled; customer's written acceptance, exception list with owners; independent-assessment status stated as "not yet" unless it exists	[K-6 weeks]	Not started	Independent security assessment not done (GO-NO-GO #2)
3	Privacy / data review and DPA	[Privacy officer / registrar]	Harrison Rubin (interim); counsel [unassigned]	Data map approved; minimum-data list; DPA reviewed by counsel on both sides; retention/deletion terms REVIEW: counsel REVIEW: privacy	[K-6 weeks]	Not started	DPA draft not counsel-approved
4	Accessibility review	[Accessibility / disability services]	Harrison Rubin (interim); qualified assessor [unassigned]	Customer's accessibility review outcome, known-limitations statement, alternative-path agreed REVIEW: accessibility	[K-6 weeks]	Not started	No qualified manual review or VPAT
5	Procurement / contracting	[Procurement / legal]	Harrison Rubin (interim)	Pilot agreement and any order paper executed by authorized signers on both sides; deal-desk review with no refusals	[K-4 weeks]	HELD (gate)	Paid pilot NO-GO; signing authority, entity, tax, insurance open
6	Implementation / configuration	[IT / operational champion]	Implementation lead [unassigned]	Tenant configured in sandbox data mode, roles accepted, UAT passed, no open P0/P1	[K-2 weeks]	HELD (gate)	No staffed implementation lead; no named-tenant UAT
7	Training and launch comms	[Champion / communications]	Customer success [unassigned]	Operators trained; student invitation wording approved; accessible materials; support route live	[K-1 week]	HELD (gate)	Staffed support not established (GO-NO-GO #6)
8	Baseline capture	[Customer analyst]	Harrison Rubin (interim)	Baseline values, definitions and queries frozen and versioned for the 3-5 primary metrics	[K-1 week]	Not started	Customer data owner not named
9	Weekly review	[Champion]	Customer success [unassigned]	Weekly pilot report issued and reviewed each week; decisions logged	[every week from K+1]	HELD (gate)	
10	Midpoint review	[Sponsor]	Harrison Rubin (interim)	Midpoint executive review held; go/adjust/stop recorded	[K + half of pilot term]	HELD (gate)	
11	Final value review	[Sponsor, champion]	Harrison Rubin (interim)	Final value report delivered; pilot-complete checklist satisfied	[E]	HELD (gate)	
12	Conversion decision	[Decision maker]	Harrison Rubin (interim)	Signed written decision: convert / expand / pause / stop (code vocabulary PilotDecision), no unresolved high-severity issue for convert/expand	[D]	HELD (gate)	

Add rows as needed (data/integration approvals, student representative review, finance/PO, communications to minors' guardians). A new row needs both owners.

10. Roadmap and next step

8. Roadmap

Roadmap capability is a hypothesis, not a commitment, and carries no delivery date. CONDITIONAL (CLM-017): label any roadmap statement non-binding and avoid dates.

9. Next step

To discuss fit, contact [CONTACT PATH - PLACEHOLDER] . The first conversation is exploratory and non-binding. Price: [PRICE TO BE CONFIRMED] . Dates: [PLACEHOLDER] .

11. Approver annex (remove before distribution)

Statement register (for the approver)

ID	Statement	Tag	Evidence / register
S1	planning and productivity experience wording	VERIFIED	CLM-001; golden journey
S2	local-first with optional synchronization	CONDITIONAL	CLM-002
S3	invitation-based validation	VERIFIED	CLM-003; GO-NO-GO-DECISION.md
S4	source label wording (scoped)	VERIFIED (proposed, not approved)	CLM-018; docs/CLM-018-SOURCE-LABEL-EVIDENCE.md
S5	works alongside existing systems in a bounded pilot	CONDITIONAL	CLM-004
S6	no live institutional connection	VERIFIED	docs/pilot/KNOWN-LIMITATIONS.md ; CLM-005
S7	pilot concept structure	VERIFIED (rules) / CONDITIONAL (offer)	pilot.ts ; CLM-004
S8	current engagement boundary	VERIFIED	GO-NO-GO-DECISION.md
S9	export, deletion, no data sale, no streaks	VERIFIED	trust content; advertising policy; ethical engagement doc
S10	repository-tested controls	VERIFIED	CLM-009; CONTROL-FACTS.md
S11	automated accessibility checks	VERIFIED	CLM-007
S12	assistive AI with human review	CONDITIONAL	CLM-011
S13	limitations table	VERIFIED	TRUST-CENTER-CONTENT.md ; KNOWN-LIMITATIONS.md
S14	roadmap is non-binding	CONDITIONAL	CLM-017

Prohibited claims

This document does not claim, and no derivative may claim: customers, logos or case studies; measured outcomes or time or cost savings; certification or compliance (SOC 2, FERPA, COPPA, GDPR, HECVAT approval); penetration-test results; uptime, recovery or support-hours guarantees; WCAG, VPAT or ACR conformance; SSO, SCIM, LTI or SIS/LMS integration availability; replacement of any official system; enterprise readiness; any price, discount or paid availability.
