perplexity

Campus Platform Blueprint

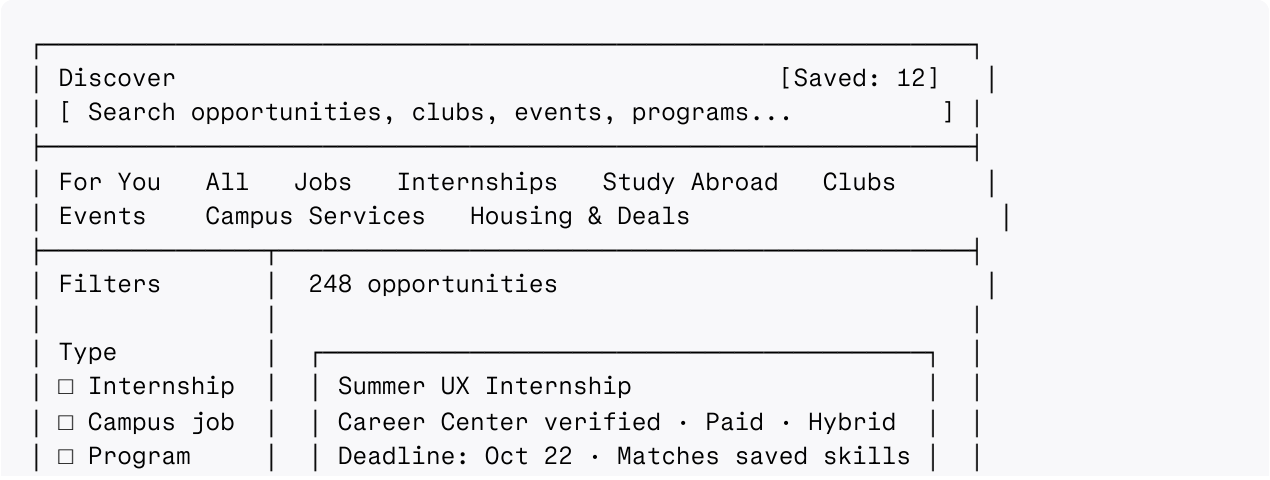

Semester Campus Life should unite four connected products: a **marketplace**, **clubs**, **global/career opportunities**, and a **student-controlled social layer**. Club-management systems commonly combine rosters, events, RSVPs, check-ins, communications, and approval workflows; Semester should provide these functions without exposing protected academic data in social spaces. [1] [2] [3]

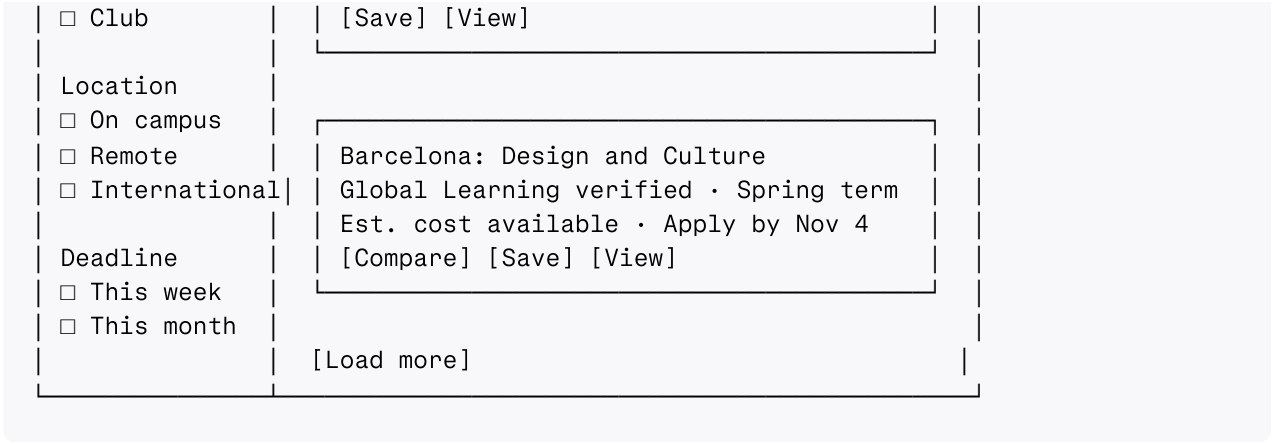

Core modules

Module	Student outcome	Staff / organization outcome
Marketplace	Finds trusted opportunities, services, jobs, and events	Publishes, verifies, moderates, and measures listings
Clubs	Discovers groups, joins, applies, attends, and participates	Runs rosters, applications, events, officer roles, and communications
Study abroad	Compares programs and completes a guided application	Manages eligibility, documents, reviews, decisions, and pre-departure steps
Internships	Tracks opportunities, applications, interviews, and offers	Publishes roles and supports career workflows
Daily feed	Sees relevant campus updates and opportunities	Sends approved announcements without spamming students
Messaging	Coordinates safely with clubs, peers, and event groups	Supports moderation and controlled official communications

Marketplace Discovery UX

Primary screen

Required filtering

Students should filter by:

- **Category:** job, internship, study abroad, club, event, campus service, peer opportunity.
- **Verification:** institution verified, partner verified, student-posted, external.
- **Timing:** application deadline, term, start date, recurring event schedule.
- **Location:** campus, remote, city/region, country, time zone.
- **Academic fit:** major, discipline, course-credit option, class year.
- **Career fit:** industry, skills, job type, paid/unpaid, work authorization.
- **Study abroad:** language, program model, estimated budget, housing, accessibility, internship component.
- **Club fit:** interest area, meeting time, dues, beginner-friendly, open membership, application required.
- **Accessibility:** wheelchair access, captions, virtual attendance, accommodation contact.
- **Commitment:** estimated hours, event duration, schedule compatibility.

Students need both a **filter drawer** for detailed search and fast filter chips such as “Paid,” “Deadline this week,” “Remote,” or “No application required.”

Search ranking and transparency

Ranking should prioritize:

1. Exact search terms.
2. Explicitly saved interests and filters.
3. Verified listings.
4. Near deadlines and relevant time windows.
5. Recently updated opportunities.
6. Clearly explained recommendations.

Show explanations such as:

```
Recommended because you saved “product design”
Shown because it matches your Spring study-abroad filter
Deadline in 5 days
```

Do not rank or target opportunities using grades, disciplinary records, disability accommodations, counseling/wellness activity, or private messages. Student privacy rules require careful treatment of education-record data in institution-provided services. [4] [2]

Listing detail page

```
┌──────────────────────────────────────────────────────────────┐
| Summer UX Internship                          [Save] [Share]  |
| Verified by Career Center · Posted 2 days ago                 |
├──────────────────────────┬────────────────────────────────────┤
| Overview                 | Apply by Oct 22                    |
| Responsibilities         | Paid: $22–28/hour                  |
| Skills and qualifications | Hybrid · Chicago                  |
| Accessibility            | 10–15 hrs/week                    |
| Employer information     | [Start application]                |
| Safety / reporting       | [Ask organizer]                    |
├──────────────────────────┴────────────────────────────────────┤
| Why this may fit: Matches your saved design interest.         |
| Verification: Institution-verified employer listing.          |
└──────────────────────────────────────────────────────────────┘
```

Every listing needs a visible source, verification label, report action, deadline, contact method, and external-site warning when students leave Semester.

Club application and roster workflow

Club platforms commonly support roster management, event planning, RSVP, check-in, communication, and approval flows. [5] [6] [1]

Student application flow

```
Discover club
    ↓
Read club profile, eligibility, commitments, dues, events
    ↓
Follow club or select Join / Apply
    ↓
Complete application or membership request
    ↓
Save draft / submit
    ↓
Under review
    ↓
Accepted / Waitlisted / Declined / Withdrawn
    ↓
Member onboarding and club-space access
```

Club application UI

```
┌──────────────────────────────────────────────────────────────┐
│ Product Design Collective — Member Application               │
│ Estimated time: 8 minutes          Due: October 18           │
├──────────────────────────────────────────────────────────────┤
│ Why would you like to join?                                  │
│ [_________________________________________________________] │
│                                                              │
│ Which activities interest you?                               │
│ [ ] Workshops   [ ] Portfolio review   [ ] Speaker events    │
│                                                              │
│ Upload optional portfolio                                    │
│ [Choose file]  No file selected                              │
│                                                              │
│ [Save draft]                          [Review and submit]    │
└──────────────────────────────────────────────────────────────┘
```

Applications should support text, selections, file uploads, availability, recommendations, interview scheduling, and required acknowledgments. Students need a receipt, version history, withdrawal option, and visible status.

Reviewer workflow

```
Submitted
   ↓
Eligibility check
   ↓
Assigned to reviewer(s)
   ↓
Blind review, if configured
   ↓
Rubric or structured review
   ↓
Decision recommendation
   ↓
Officer / staff approval
   ↓
Student notified
```

Use separate roles:

Role	Permissions
Applicant	Own application, status, messages, decision
Member	Club content, events, member directory as permitted
Officer	Roster, events, approved communication, limited application review
Application reviewer	Assigned applications and scoring only
Faculty/staff advisor	Governance oversight, escalation, approvals

Role	Permissions
Student-life administrator	Organization verification, policy, audit, reporting

Roster management

```
┌──────────────────────────────────────────────────────────────┐
│ Robotics Club / Members                          [Invite]    │
│ 112 active · 8 pending · 4 officers                          │
├──────────────────────────────────────────────────────────────┤
│ Search member                          [Export, if authorized]│
│                                                              │
│ Jordan Lee       Member       Attended 4 events   [Manage]   │
│ Maya Patel       Treasurer    Attended 7 events   [Manage]   │
│ Alex Kim         Pending      Application review  [Review]   │
├──────────────────────────────────────────────────────────────┤
│ [Add role] [Send announcement] [Create event] [View requests]│
└──────────────────────────────────────────────────────────────┘
```

Roster functions:

- Join, invite, approve, deny, remove, or suspend membership.
- Assign time-limited officer roles.
- Record dues status only where permitted.
- Maintain attendance and participation records.
- Create leadership-transition checklists.
- Limit exports by role, purpose, and audit trail.
- Keep alumni and former members separate from active rosters.
- Preserve member privacy controls.

Attendance, RSVP, and QR check-in are established club/event patterns and should remain optional—not a hidden surveillance mechanism. [3] [6]

Study abroad and internship trackers

Study-abroad applications commonly include an initial application, institutional eligibility review, nomination, provider decision, commitment, and pre-departure requirements. The exact sequence varies by institution and program. [7]

Application tracker

```
┌──────────────────────────────────────────────────────────────┐
│ Barcelona: Design and Culture — Spring 2027                  │
│ Status: In institutional review                              │
├──────────────────────────────────────────────────────────────┤
│ ✓ Personal details                                           │
│ ✓ Academic information                                       │
│ ✓ Statement of purpose                                       │
```

```
| ! Faculty recommendation — requested; due Oct 19              |
| ○ Passport upload                                             |
| ○ Program-provider application                                |
| ○ Pre-departure orientation                                   |
├──────────────────────────────────────────────────────────────┤
| [Message advisor] [View documents] [Withdraw application]    |
└──────────────────────────────────────────────────────────────┘
```

Key application states:

```
Draft → Submitted → Eligibility review → Nominated
→ Provider review → Accepted / Waitlisted / Declined
→ Student committed → Pre-departure → Completed / Withdrawn
```

Do not represent an automated preliminary eligibility check as a final academic or admission decision.

Internship tracker

```
Saved → Preparing → Applied → Interviewing
→ Offer → Accepted / Declined → Active internship → Completed
```

Students should see deadlines, application materials, interview notes, recruiter communication preferences, work/credit requirements, and reminders. Employers should not gain access to grades, course schedules, or protected records through this tracker.

Daily feed and messaging schema

Feed design

The feed has three modes:

Mode	Purpose
Following	Chronological posts from followed clubs, people, and official offices
Campus	Moderated campus-wide announcements and discoverable activity
For You	Explainable recommendations from explicit interests, saves, and opt-in preferences

Feed cards can represent:

- Club announcements.
- Events and RSVP reminders.
- Marketplace opportunities.
- Study-abroad and internship deadline reminders.
- Campus-service updates.
- Peer study-group requests.

- Polls, photos, video, and discussion posts.
- Official emergency or safety communications.

Never place grades, assignment submissions, accommodation information, disciplinary records, private application status, or private advising information in a social feed. Guidance on social media and FERPA emphasizes that instructor comments and grades should not be made public. [8]

Social data model

Table/entity	Key fields
`profiles`	User, display name, photo, bio, privacy level, opt-in flags
`follows`	Follower, target user/org/topic, status, notification preference
`communities`	Club, course cohort, interest group, program cohort, visibility
`posts`	Author, community, content, visibility, media, status, timestamps
`comments`	Post, author, parent comment, body, moderation state
`reactions`	User, target, reaction type, timestamp
`topics`	Name, category, safety classification
`post_topics`	Post-to-topic relationship
`reports`	Reporter, target, reason, evidence, priority, status
`moderation_cases`	Assigned reviewer, action, rationale, appeal status
`notifications`	Recipient, event type, delivery preference, read status
`feed_impressions`	Viewer, item, ranking reason, visibility decision
`feed_preferences`	User, muted topics, blocked accounts, ranking controls

Real-time messaging schema

Table/entity	Key fields
`conversations`	Type, creator, organization/context, status, created time
`conversation_members`	Conversation, user, role, joined/left timestamps, notification setting
`messages`	Conversation, sender, encrypted/body reference, attachment status, edited/deleted timestamps
`message_requests`	Sender, recipient, request state, anti-spam signal
`message_reactions`	Message, user, reaction type
`blocks`	Blocker, blocked account, scope
`message_reports`	Reporter, message, reason, moderation status
`presence`	User, availability setting, last-seen policy—not exact location

Table/entity	Key fields
`typing_indicators`	Ephemeral channel state; do not retain unnecessarily

Messaging controls

- Message requests by default for people without an accepted connection or shared organization.
- Club announcements can be one-way, discussion-enabled, or moderated.
- Event chats can auto-expire after an institution-defined period.
- Students choose availability, read receipts, and notification settings.
- Blocking immediately prevents new direct contact.
- Rate-limit new conversations and attachments.
- Scan uploads for malware before delivery.
- Provide report and escalation routes in every conversation.

Interactive feature roadmap

The matrix below can become a sortable product-planning table in the Semester admin console.

Feature	Primary users	MVP	Dependency	Risk level
Marketplace search and filters	Students	Yes	Verified listing catalog	Medium
Saved listings and alerts	Students	Yes	Notification service	Low
Club directory and profiles	Students, officers	Yes	Organization approval data	Low
Club applications	Students, reviewers	Yes	Form engine, workflow	Medium
Roster and officer roles	Officers, staff	Yes	Identity and authorization	High
RSVP and QR event check-in	Students, officers	Yes	Event service	Medium
Study-abroad tracker	Students, global office	Yes	Program/application system	High
Internship tracker	Students, career office	Phase 2	Employer and application data	High
Following feed	Students	Phase 2	Post, follow, moderation services	High
Recommended feed	Students	Phase 3	Consent-aware ranking engine	High
Direct messaging	Students	Phase 2	Safety, blocking, moderation	High
Group/event chat	Students, organizations	Phase 2	Messaging, event membership	High
Payments/dues	Clubs, students	Phase 3	Approved payment provider	Very high

Build the marketplace and club workflows first, then add social features after moderation, privacy controls, identity verification, and reporting operations are fully functional.

Which workflow would you like to turn into a detailed build specification next: **marketplace listing creation**, **club event management**, or the **study-abroad application tracker**?
