

Semester: Board and Investor Summary

Forecasts on planning assumptions

Internal draft for advisers and a prospective board. Not an offer of securities.

Operating document. It is not legal, tax, accounting, insurance, privacy, security or accessibility advice. Every figure is a planning assumption or forecast, not an approved price, budget or target.

ASSUMPTION VERIFIED DRAFT INTERNAL APPROVED REVIEW

Every statement is labelled. No item in this document is a customer-facing approved claim: no named approver is recorded for any wording.

How to read the labels

Labels apply to a section, a table row or a bullet, not to every sentence. The count is how many label tags appear in this document; legend mentions in code formatting are not counted.

Label	Meaning	Count
VERIFIED	Verified implementation or evidence. Backed by a path in the repository or an evidence id.	0
ASSUMPTION	Planning assumption. A number, rate, timing or price chosen to plan with. Not evidenced.	0
DRAFT	Draft requiring review. Default for anything new.	0
APPROVED	Customer-facing approved claim. Needs a named approver and a register row. None exists today.	0
INTERNAL	Internal-only material. Never to be sent to a customer or prospect as written.	0
REVIEW	Professional review required: counsel, tax, accounting, insurance, privacy, security, accessibility or procurement.	0

Planning assumptions are labelled ASSUMPTION. **Verified claims** are labelled VERIFIED and name their evidence. **Draft and internal items** are labelled DRAFT and INTERNAL. **Customer-facing approved material** is labelled APPROVED and is absent: the count above is zero. **Professional-review items** carry a REVIEW flag naming the profession.

Control	Value
Status	DRAFT, INTERNAL. NOT A FORECAST THE COMPANY STANDS BEHIND. NOT AN OFFER OF SECURITIES.
Owner	Harrison Rubin (interim)
Evidence date	2026-10-05 at repository revision 5eba494 plus this branch
Labels used	VERIFIED ASSUMPTION DRAFT INTERNAL REVIEW: ... APPROVED count: 0

This is a planning summary for advisers and a prospective board. It is not investment, legal, tax or accounting advice. No figure is evidenced; all are forecasts on planning assumptions. REVIEW: counsel before it is shown to any investor.

Where the company is VERIFIED

A built product in invitation-only validation; no customers, no pilot, no revenue, no paid availability. The go/no-go decision of 2026-10-03 holds the paid institutional pilot at NO-GO/RED. Ten blockers stand between today and a paid pilot, among them an independent security assessment, a qualified accessibility review, counsel-approved paper, entity, tax and insurance authority, staffed support and restore exercises. A single founder holds every owner seat.

The thesis ASSUMPTION

Win one narrow, measurable institutional workflow through a pilot, convert it to an annual contract, and use measured student outcomes as the proof for renewal and expansion. The company must be viable without advertising or marketplace revenue.

Model results ASSUMPTION (Forecast, 36 months, from the in-app model)

Scenario	Month-36 ARR	Year-3 revenue	Year-3 gross margin	Funding needed	Break-even
Conservative	\$21.9k	\$83.5k	-142%	\$1.21M	none in 36 mo
Base	\$110k	\$332k	28%	\$724k	none in 36 mo
Ambitious	\$372k	\$948k	60%	\$172k	month 35
Downside / delayed sales	\$60k	\$199k	-10%	\$1.03M	none in 36 mo
Long procurement cycle	\$82.4k	\$305k	25%	\$908k	none in 36 mo
Pilot-heavy	\$154k	\$613k	56%	\$261k	none in 36 mo
Annual-contract-heavy	\$206k	\$386k	32%	\$696k	none in 36 mo
High AI usage	\$110k	\$400k	-3%	\$885k	none in 36 mo
Low student adoption	\$107k	\$331k	31%	\$709k	none in 36 mo
High implementation cost	\$110k	\$332k	28%	\$895k	none in 36 mo
Low conversion	\$24.5k	\$174k	-21%	\$1.01M	none in 36 mo

Scenario	Month-36 ARR	Year-3 revenue	Year-3 gross margin	Funding needed	Break-even
High conversion	\$196k	\$397k	34%	\$643k	none in 36 mo

Opening cash is a \$100,000 placeholder. "Funding needed" is the deepest the cash balance goes below zero.

Unit economics ASSUMPTION

Base: ARR per institution about \$49.5k; unit gross margin 65%; CAC about \$157k per annual customer (a thin denominator carrying founder selling time); payback about 59 months; LTV about \$214k; LTV : CAC about 1.4x; net revenue retention 93.5% by formula and 92.7% measured. All rest on retention and conversion that have never been measured.

What the numbers say DRAFT

1. Volume is the constraint, not price. At about three pilots a year Base does not carry a team.
2. The first design-partner engagement exists to replace the model's rates with measured ones: conversion, cycle length, implementation hours, support load, AI usage.
3. AI economics need a decision: the included pool may cost more than the platform fee at the repository's higher cost estimate.
4. Delivery capacity is tight: one delivery head covers about 0.3 new implementations a month.

Decisions asked of the board INTERNAL

1. Whether to fund the go/no-go blockers (security assessment, accessibility review, counsel, entity and insurance) shown in the model as required obligations.
2. Which hypothesis to test first with the first design partner.
3. Settlement of the open conflicts: pilot length, individual price, institutional price unit, and whether to price a pilot at all.

Key risks INTERNAL

Single-founder capacity and key-person risk; no references or outcomes; paid-pilot gate; security and accessibility evidence gaps; pricing conflicts; AI cost exposure; long higher-ed procurement; unproven student adoption. Full register: docs/business/templates/RISK_REGISTER.md (28 risks).

Evidence state

Repository evidence. Model and tests are in the repository. **Operational evidence.** None. **Missing proof.** Every input marked placeholder or assumption in the model.

Claim ceiling

Planning discussion with advisers and a prospective board, labelled as forecast.

Prohibited claims

Do not present any figure here as the company's revenue, ARR, runway, valuation, traction or expected return. Do not describe customers, pilots or outcomes.

Professional review required

REVIEW: counsel securities and communications law before any investor use. REVIEW: accounting REVIEW: tax model basis. REVIEW: insurance coverage.
